

DigiDocFlow®

**Lotus®
software**

& Lotus Notes

Scan directly to an email address from the Lotus Notes email address book

With DigiDocFlow it's very easy to use the email application which you already use, for sending a scanned document to an email address. DigiDocFlow is capable to scan a document and send it directly to an email address retrieved from the Lotus Notes email address book. DigiDocFlow makes scanning and sending of documents easy. All documents can be digitalized without having to install software on local workstations. DigiDocFlow runs on a non-dedicated central server. In addition, DigiDocFlow is a middleware application, which means that the user does not 'see' the software while working with it. Benefit of this is, that product training is not necessary. Everyone can use it straight away.

Lotus Notes is an easy to use email solution that helps improve working efficiency through an intelligent email environment; all within one easy to use solution. Lotus Notes simplifies the access to business e-mail, calendars and applications, helping users to make business decisions quickly and streamline the way users work.

Easy scanning

Scanned documents can be sent to an email address which is retrieved from the Lotus Notes email address book, directly from the multifunctional printer.

DigiDocFlow - Experience simplicity

Benefits:

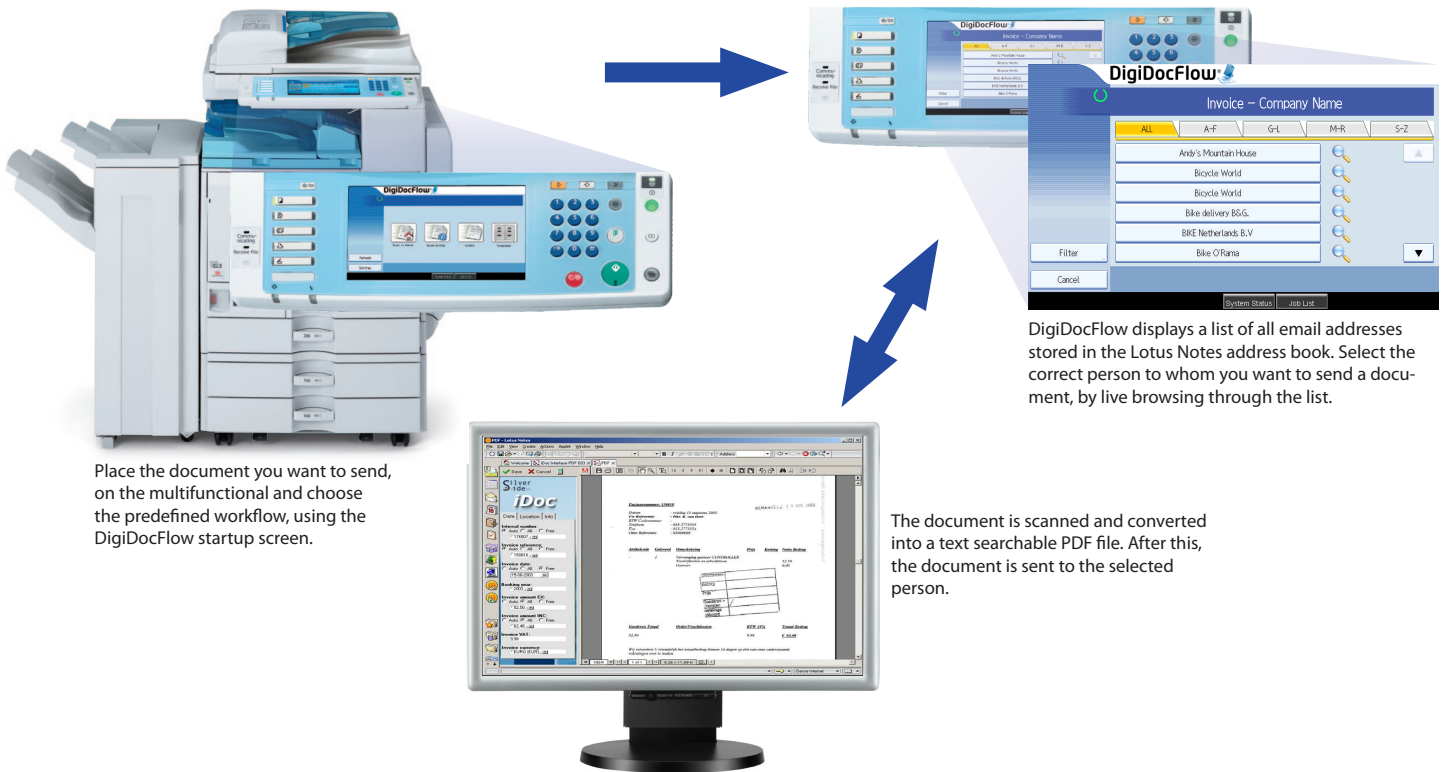

- Send documents directly to an email address from the Lotus Notes email address book
- Reasonably priced
- Text searchable PDF files
- Output of editable Word & Excel files
- Simple configuration & installation
- Easy to use
- No product training required

DigiDocFlow®

Send documents directly to an email address

Through a connection between DigiDocFlow and Lotus Notes, it is possible to scan documents and send these directly to an email address. DigiDocFlow displays a list of all email addresses generated from the Lotus Notes email address book. Users can select the correct person to whom a document needs to be send. DigiDocFlow will scan the document and convert it into a text searchable PDF file and attach it to an email. Via the Lotus Notes client the document is send to the selected person. A copy of the email is automatically stored in the users mailbox.
